SUMMARY

B.Tech Computer Science student with strong command over HTML and CSS, experienced in building real-world projects including Netflix and Amazon clones.. Finance enthusiast with 2+ years of experience in stock market trading, specializing in price action and algorithmic strategies. Skilled in Python, SQL, and frontend development with a strong analytical and problem-solving mindset. Passionate about leveraging technology and data-driven approaches to solve real-world problems. Seeking opportunities to apply my skills in a dynamic and growth-oriented environment.

SKILLS

- Financial Market Analysis
- Fundamental Analysis
- Algorithmic Trading
- Risk Management
- Python, SQL
- HTML, CSS, MS Excel
- Machine Learning

Projects

Equity Market & Algorithmic Trading Analyst (Self-Employed)
2023 – 2026
- Analyzed stock market trends using price action and volume.
- Developed and tested trading algorithms using candlestick patterns.
- Applied risk management strategies like position sizing.
- Managed personal portfolio including equities and mutual funds.

Web Development Project(Self-Employed)
May 2025 – Aug 2025
- Built websites using HTML and CSS with the help of modern tools.
- Created Netflix and Amazon clones.
- Improved frontend design skills and understanding of real-world web structures.

Sonar-Based Object Detection System (Machine Learning Project)(Jan 2026-April 2026)

Developed a Machine Learning model based on sonar signal data to classify objects (e.g., metal vs rock).
Used data preprocessing, feature analysis, and classification algorithms to improve prediction accuracy.
Implemented the project using Python and ML libraries (like NumPy, Pandas, Scikit-learn).
Trained and tested the model on real dataset to analyze performance and accuracy.
Gained hands-on experience in supervised learning and real-world signal-based prediction systems.

EDUCATION

B.Tech in Computer Science Engineering (Expected 2028)
JK Lakshmipat University, Jaipur

ACTIVITIES

- Active in stock market analysis and investment decisions.
- Continuous backtesting and strategy improvement.
- Managed personal portfolio with focus on risk and returns
- Actively involved in coding and web development projects.
- Built and experimented with frontend designs using HTML and CSS.
